23. Problem: (use additional Sheets if necessary) Drop 6A.05 external subsetter interface requires NFS mounts from external subsetter to STGMNT for handing off subsetted file to ECS for distribution. The designated DUE machines (misrqa and codis) currently reside on the M&O network. These DUE machines need to be moved to the larcb network.						
24. Proposed Solution: (use additional sheets if necessary) Move the DUE machines (misrqa and codis) to the larcb network from the M&O network.						
25. Alternate Solution: (use additional sheets if necessary) Do not use ECS distribution for external subsetted file delivery or use NFS mounts across the router between larc and larcmo networks.						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) Unable to install External Subsetter from University of Alabama. Must continue to use DUE for distribution tracking of MISR subsetted files.						
27. Justification for Emergency (If Block 15 is "Emergency"):
